@update :

I solved my error by tweaking a bit your links function :

```
def links( self ):  
    links = []  
    for count, crumb in enumerate( self.crumbs, start = 1 ):  
        crumb_uri = self._protocol + '/' .join( self.crumbs[ 0:count ] )  
        links.append({'uri':crumb_uri, 'crumb':crumb})  
    return links
```

I also embedded it in a Bootstrap breadcrumb (as suggested earlier) :

```
% for link in request.bread.links:  
  
    <a href="{link['uri']}" rel="nofollow">{link['crumb']}</a> /  
  
% endfor
```

Thanks again for this useful tool !

Julien
