Generator: Remarkbox 3053704

This is a subthread snapshot. The living document lives at the source URI above — it may have been edited, extended, or replied-to since.

Scan for living
source

Your comments aren't lost -- they're still stored under the original page URL.

Remarkbox ties each comment thread to the page URL (called the `thread_uri`). When you move the embed snippet to a different page, the URL changes, so Remarkbox sees it as a brand new thread.

To fix this, set the `thread_uri` manually in your embed snippet so it always points to the original URL:

```
var defined_thread_uri = "https://your-site.com/original-page-url";
```

That pins the comments to that URL no matter where the embed lives.
