Scan for living
source

This is a thread snapshot. The living document lives at the source URI above — it may have been edited, extended, or replied-to since.

A Namespace is a "container" for all the threads related to a site. A User may moderate and/or own none or many Namespaces.

From the Namespace Settings dashboard an owner may control how Remarkbox looks and behaves.

For example:

- force all new comments into moderation before displaying them
- upload or link to a custom style sheet (CSS)
- disable the "Powered By Remarkbox Logo" in the thread footer
- moderate any comment in the Namespace (e.g. edit, allow, deny, delete)
- enable add-ons (e.g. [MathJax](#))
- enable Slack notifications
- download all comments from the Namespace for backups or exporting into a new system

Where is my namespace settings?

russell — Mar 09, 2020 12:49 pm

You may navigate to your Namespace Settings by going to:

<https://my.remarkbox.com/>

From there you should see a list of Namespaces or click Setup to create a new one.

ChrisB — May 29, 2021 11:45 am

Where does Remarkbox pull the avatar from? Is it gravatar?

russell — May 30, 2021 08:23 am

By default the avatar is built in using the first letter of the user's display name. A user may toggle to gravatar from their user settings page to use that instead.
