Hi Russell!

Is there a way to delete a website from Remarkbox? I've used a website for testing purposes and want to delete it from the dashboard. BTW, maybe you can create a dashboard button to access all the sites because right now the fastest way is to press "Setup" then "Back".

russell — Feb 21, 2022 11:14 am

It's currently a manual process, if you r a coder please check out this blog post, to get started on reviewing the code & proposing a pull request.

I see, thanks for the reply! ☐

timehexon — Feb 01, 2026 08:07 pm

You can now delete a namespace directly from the namespace settings page. There's a confirmation step so you won't accidentally nuke anything. It cleans up everything -- all threads, comments, watchers, notifications, and the namespace itself.

Previously this was only possible through a command-line admin script, so you had to ask us to do it for you.
