Yes, you may completely control the look and feel of Remarkbox using CSS in your Namespace settings dashboard.

Additionally, if you need even more control, you setup a DNS CNAME record and build a custom Remarkbox theme.

Once this is done, you can use Remarkbox as your website's:

- Frequently Asked Questions Page
- Forum or Discussion Board
- Question and Answer Service

Did you know this page you are looking at right now is just Remarkbox running the custom Remarkbox meta theme?

If this is something you want to learn more about, you should contact me about setting up an agency plan. I can also build your theme to match your existing web site.
